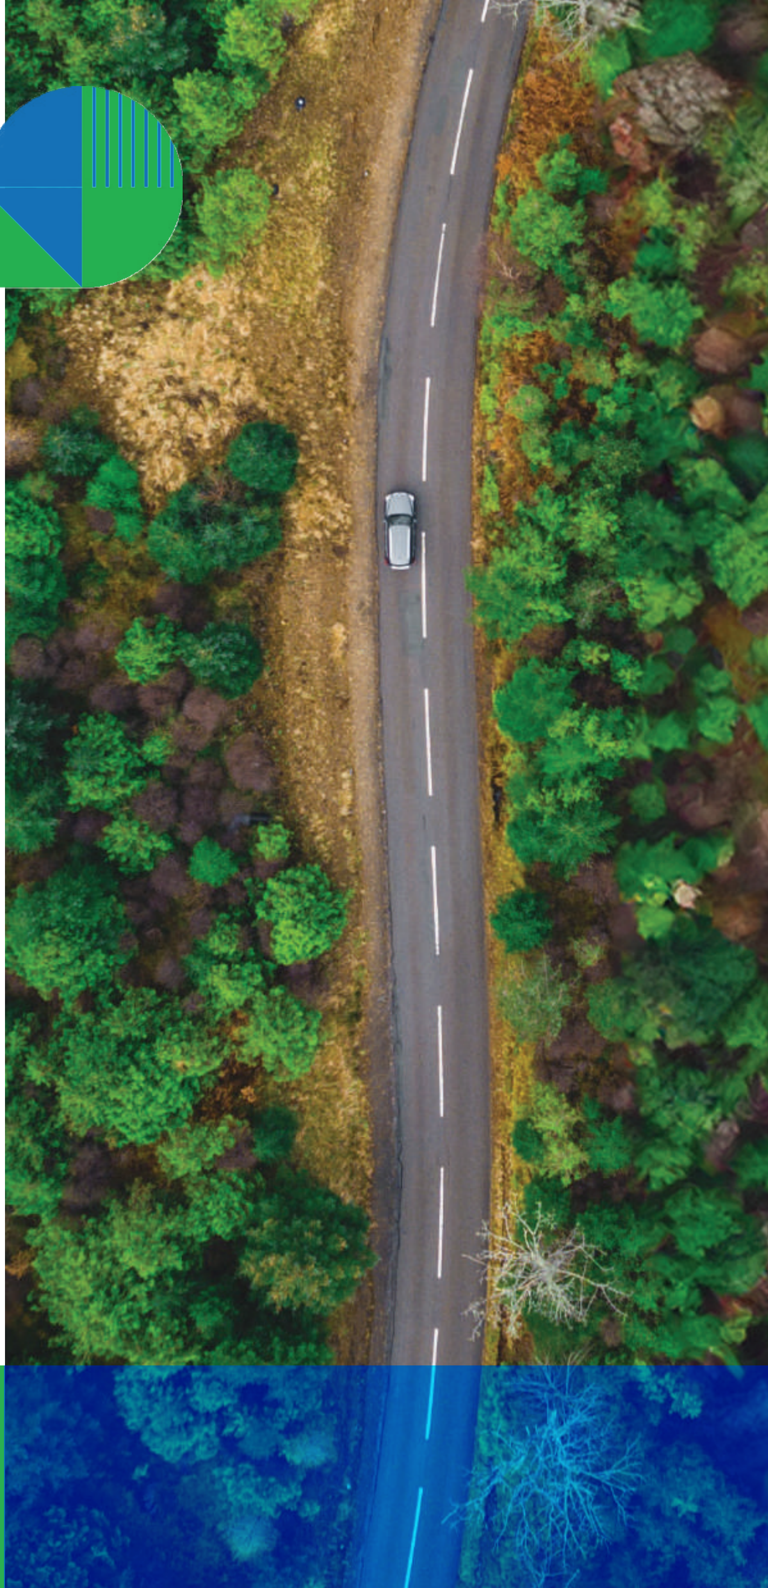
eVMI

Brand Guidelines

Brand Identitiy Manual



Welcome

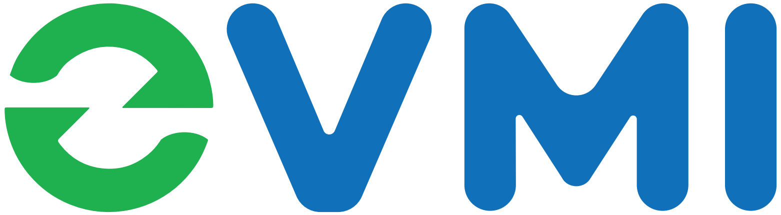
These brand guidelines are designed to ensure a consistent look and consistent tone in all of it's communications.

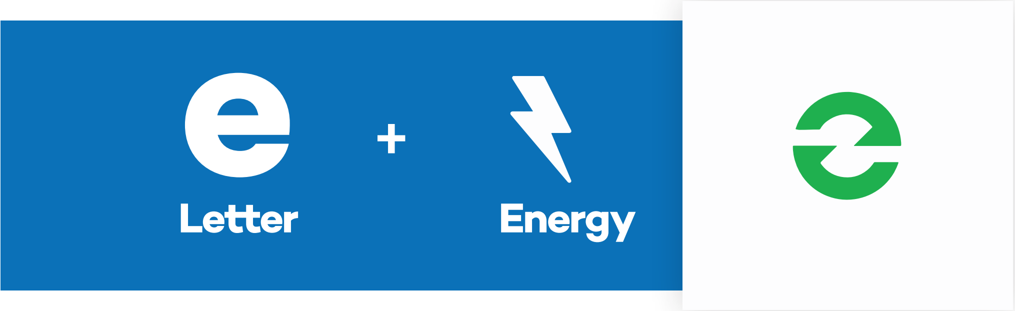
This document will act as a guide to understand the eVMI Logo and the various aspects to consider while using the logo on a particular marketing collateral.

About Us

VM Innovations, a Singapore-based engineering solutions developer, offers automation and test development solutions in industries like Semi-Conductors, Automotive, and Infrastructure, partnering with tech giants like National Instruments.

Brand Mark





Please do not attempt to recreate, modify, or change the logo in any way. Always use an approved version.

Meaning

The logo for VM Innovations, crafted for its electric vehicle charging services, smartly embeds a power icon within the **letter "e" to signify energy** and align with the brand's core offering. The "VMI" upholds the existing brand identity, while the color scheme of green and navy blue reinforces the eco-friendly and innovative ethos of the EV industry.
The power symbol serves as a mnemonic, enhancing brand recall. Green connects to the go-green initiative, and navy blue adds a professional touch, together ensuring the logo is memorable and relevant within its market.

Logo on Background

Primary version of our logo

Colors: The two-color logo uses Green Haze, & French Blue.

Preferred background: When possible, the logo should be placed on white.

Actual Logo

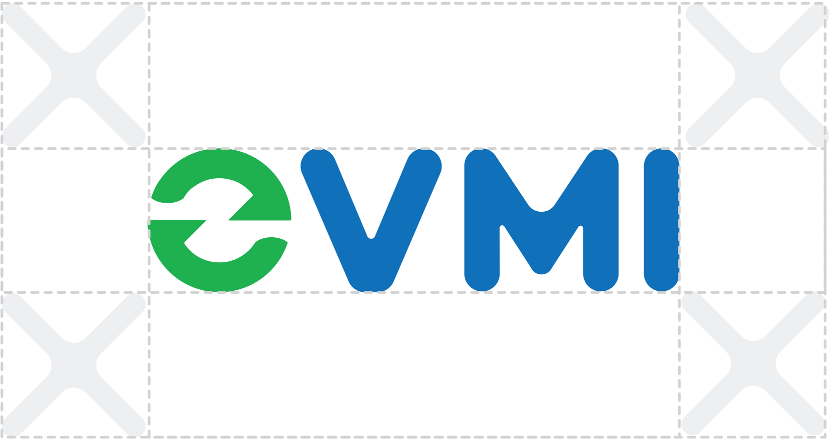
Reversed Logo

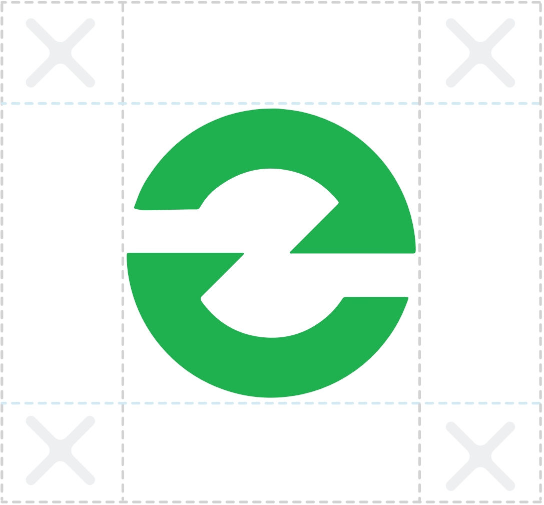
Logo Construction

Logo Clear Space

Our logo needs to stands out. To reach this goal, make sure it has breathing space around it. Do not allow elements such as photography, background patterns, or typography to crowd or infringe upon the clear space of the logo. Keeping a defined amount of clear space around our logo and graphic elements helps maintain their integrity and maximizes their visual impact.

The minimum amount of clear space is derived proportionally by the height of the letters in the word Spaced.





Brand Color Usage

Colors are as important to our brand as the logos Themselves. Just as Punctuation and volume set the tone for our verbal and written style, color sets the tone for our visual style.

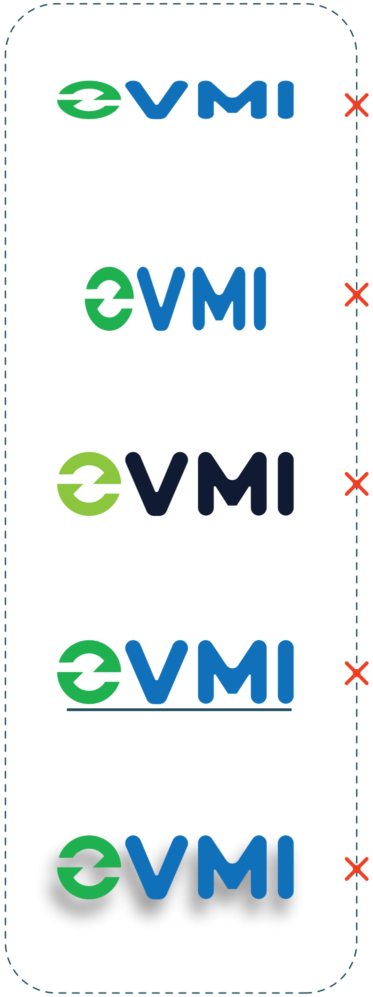
Maintain the font pairing, Tracking, leading and paragraph headlines.

Do’s & Don’t s



✗ Do not skew, stretch

✗ Do not squeeze

✗ Do not change the colors of the logo

✗ Do not add elements to the logo

✗ Do not apply gradients, drop shadows, or other effects to the logo

DO

Always use an official logo file and never attempt to recreate the logo from scratch. Give the logo its correct clear space and always use the correct colors. When resizing the logo, maintain the proportions of the original.

DON’T

Never skew or distort the logo, change its colors or apply effects. And never add any other elements to the logo.
